IMPORTANT NOTICE

Read carefully the SkyCaddie TOUCH Product Information Guide before use of the SkyCaddie TOUCH. Failure to read and follow the Product Information Guide may cause serious injury or death.

The SkyCaddie TOUCH specifications and functionality are constantly evolving, and we may update or change them in whole or in part, without notice to you. Such updates may be required for you to use new functionality, access new courses or features, or continue to access and use existing courses and features. The courses and features available for use on the SkyCaddie TOUCH change from time to time, and not all courses or features previously offered will be available. Some features require an annual subscription.

The software in the SkyCaddie TOUCH is licensed and not sold to you, and is subject to the End User License Agreement set forth in the SkyCaddie TOUCH Product Information Guide.
CHAPTER 1

1.0  GETTING STARTED

1.0.1  CHARGING YOUR SKYCADDIE TOUCH

Your SkyCaddie Touch will receive a relatively faster and more complete charge when you recharge it via a wall outlet.

Always make sure that your SkyCaddie TOUCH is fully charged prior to play. It is recommended that you recharge your SkyCaddie TOUCH after each round to ensure that it is always ready to play whenever you are. If the battery level is low, a full recharge may take 4-6 hours. While it is also possible to charge your TOUCH via a computer that is powered on or via a car charger, using a wall outlet will charge your TOUCH in less time.

1.0.2  CHARGING YOUR TOUCH USING A WALL OUTLET

1. Pull back the rubber cover located on the bottom of your SkyCaddie TOUCH to gain access to the micro-USB port.
2. Take the cable that is included in the box, insert the micro-USB connector into the open port and insert the other end of the cable into the power adapter included in the box.
3. Plug the power adapter into an open wall outlet or surge protector.
4. Your SkyCaddie will automatically begin charging and the LED will flash if the battery is not fully charged. The LED will become solid when fully charged.

1.0.3  CHARGING YOUR SKYCADDIE TOUCH USING YOUR COMPUTER

Your SkyCaddie TOUCH will charge when it is connected to a computer that is powered on. Simply connect the USB end of the cable to your computer and the micro-USB end to the TOUCH. If your TOUCH is powered on, it will initially display the “Sync” screen and then will indicate that your TOUCH is being charged. Your SkyCaddie will automatically begin charging and the LED will flash. When fully charged, the LED will become solid.
PLEASE NOTE: The Micro-SD port on your SkyCaddie TOUCH is for SkyGolf diagnostic purposes only. DO NOT INSERT a Micro-SD card in this port.

1.1 ACTIVATING AND REGISTERING YOUR SKYCADDIE TOUCH

1.1.1 INSTALLING THE LATEST VERSION OF CADDIESYNC® EXPRESS ONTO YOUR COMPUTER:

1. Using a computer with Internet connection, launch a web browser and type the following address in the address field:
   http://www.myskycaddie.com

2. Click the “Sync” button to initiate the installation process. After CaddieSync® Express is successfully installed, you can simply click on the “Sync” button at the upper right-hand corner of the SkyGolf.com website to sync your TOUCH with your SkyGolf® account.

3. Follow the simple onscreen instructions to complete installation.

   Upon installing CaddieSync Express successfully on your computer, the application will prompt you to connect your TOUCH to the computer so you may complete the activation process. Follow these simple steps to connect your TOUCH to your computer using the USB cable provided:

4. Pull back the rubber cover located on the lower back side of the TOUCH to gain access to the Micro-USB Port. Take the cable that is included in the box and insert the micro-USB connector (the smaller end) into the open port.

5. Connect the USB end into an open USB port on your computer.

6. After connecting your TOUCH as prompted by CaddieSync Express, click “Sync” to start the communication process. CaddieSync Express will attempt to connect to your TOUCH.

7. For first time users, CaddieSync Express will return a message instructing you to register your SkyCaddie. From that screen, click “Register Now” to start the process. The application will prompt you to create a login and password.
1.1.2 THE SKYGOLF 360™ MOBILE APP

With the SkyGolf 360 app on your mobile device, everything about your game is just a touch away. Anytime. Anywhere. From the palm of your hand and without a cable! Download the FREE SkyGolf 360 app onto your mobile device from your favorite app store and:

- Search, add and get the latest and most accurate course updates “onDemand.”

- Your SkyCaddie TOUCH communicates with the SkyGolf 360 app via Bluetooth® to wirelessly upload scores and stats to SkyGolf’s online member community for fast and easy review of your rounds and game analytics.

- Manage your SkyGolf account and SkyCaddie devices with ease.

1.1.3 PAIRING YOUR TOUCH WITH YOUR MOBILE DEVICE FOR USE WITH THE SKYGOLF 360 MOBILE APP

1. On your mobile device, go to SETTINGS and select BLUETOOTH. Make sure Bluetooth® is turned on.
2. On the main menu of your SkyCaddie TOUCH, press the “Sync” button. This will turn on Bluetooth and allow your mobile device to connect to your SkyCaddie TOUCH.

3. Your mobile device will display a list of discovered devices. Select your SkyCaddie TOUCH (“TOUCH ######”) from this list to connect and start the pairing process. Confirm any prompts that appear.

4. Your SkyCaddie TOUCH is now paired and will appear in the SkyGolf 360 app.

1.2 ACTIVATING YOUR SKYCADDIE TOUCH

There are two ways to activate and register your SkyCaddie TOUCH:

1. Via Bluetooth® wireless technology on your mobile device.
2. Via the CaddieSync Express software installed on a computer.

SkyGolf is continually improving the software on its products. After the initial activation of your SkyCaddie, it is a good idea to sync with the SkyGolf website via your computer and the enclosed USB cable to periodically check for and install new updates for your TOUCH.

1.2.1 ACTIVATE YOUR SKYCADDIE TOUCH ON YOUR MOBILE DEVICE VIA BLUETOOTH

1. Using your smartphone or tablet, go to the Google® Play™ Store or the Apple® App StoreSM to download the SkyGolf 360™ Mobile App.

2. Make sure Bluetooth is enabled on your mobile device and pair it with your SkyCaddie TOUCH, if you have not already done so. (Also see section 1.1.3)

3. Open and sign into the installed SkyGolf 360 Mobile App on your mobile device or create an account, and follow the onscreen directions.

1.2.2 ACTIVATE YOUR SKYCADDIE TOUCH VIA THE ENCLOSED USB CABLE

1. Connect your SkyCaddie TOUCH to your computer, using the enclosed USB cable.

2. Go to www.SkyCaddie.com, click on “Register” and follow the onscreen instructions.
2.0 SKYCADDIE TOUCH OVERVIEW AND MAIN MENU

2.1 NAVIGATING YOUR SKYCADDIE TOUCH

2.1.1 NAVIGATION: EXTERNAL BUTTONS

Your SkyCaddie TOUCH only has two external buttons:

- **Power Button**: To power on your SkyCaddie, press and hold the Power button until the display turns on. To power off, press and hold the Power button for about three seconds and confirm the prompt on the screen of your SkyCaddie TOUCH.

- **Menu Button**: Press the Menu button on the side of your SkyCaddie to display the Main Menu of the TOUCH while it is powered.

TIP: You can lock the screen of your SkyCaddie TOUCH to avoid inadvertent button pushes by briefly pressing the Power button. Unlock the screen by briefly pressing...
on, unless there is a pending task the device requires you to complete first. During play, pressing the Menu button will also allow you to select, review and adjust your Round Options (see 3.4.3).

2.1.2 NAVIGATION: TOUCH SCREEN

The screen of your SkyCaddie TOUCH responds to several primary gestures:

- **Single tap**
- **Press and hold**
- **Drag**

Your SkyCaddie TOUCH has a glove-friendly, resistive screen, which requires you to press it firmly, but not hard.

2.1.3 NAVIGATION: ONSCREEN BUTTONS

- **Play Golf**: Your SkyCaddie will automatically search for the golf course(s) nearest to you and display shortcut buttons for alternate ways to select a course to play. (See section 3.0.2.)

- **Course Library**: Your TOUCH will display the list of courses you have downloaded in Vivid HD+ and display shortcut buttons for alternate ways to select a course to play. (See section 3.0.2.)

- **Resume**: If you have a round in play, press the “Resume” button to continue your most recent, incomplete round.

- **Sync**: Press the “Sync” button on the screen to upload data from your SkyCaddie to SkyGolf 360™ via Bluetooth®.

- **Saved Rounds**: Press the “Saved Rounds” button on the screen to access rounds you had previously saved.

- **Settings**: Press the “Settings” button on the screen to access several sub-menus, which include a number of options, settings and information used to customize your TOUCH to best fit your needs. (Also see Chapter 4)

- **+ and -**: Use the “+” and “-” buttons below the screen to scroll up and down any list displayed on your screen.
(see section 3.1.1), pressing these buttons will allow you to zoom in and out manually.

- **Back:** Most menus on your SkyCaddie TOUCH will feature a “Back” button in the top left of your screen. Pressing this button will return you to the previous screen.

2.1.4 **ON-SCREEN INDICATORS**

- **Battery Gauge:** Displays the TOUCH’s remaining battery level. See section 1.0 and Appendices A and C for more information about your battery and charging your SkyCaddie.

- **Digital Clock:** Displays the current time based on the signal that the TOUCH receives from the satellites. See Section 2.1.5 on how to set the time on your SkyCaddie.

- **Satellite Signal Indicator:** Shows real-time GPS satellite signal strength. The plus sign (+) above the signal bars indicates that SBAS (Satellite-Based Augmentation System) has been acquired. This is the preferred signal level for optimal performance. For more information and tips about acquiring GPS signals can be found in section 3.0.

2.1.5 **SETTING THE TIME**

We recommend setting the time during or after your first round of golf, when you are outside, as your TOUCH will automatically set the time when it first acquires a GPS signal. However, should you need to adjust the hour up or down based on your current location, here is how to set the time on your SkyCaddie TOUCH:

1. In the Main Menu, press on the “Settings” button

2. In the Settings Menu, press on “System”

3. Press on “Adjust Time” and change the hour by pressing the up and down arrows. Your TOUCH will automatically synchronize the minutes.

4. Press the “Back” button to return to the previous menu or the external Menu button to return to the Main Menu.
2.2 GROUND MAPPED COURSES FOR YOUR SKYCADDIE TOUCH

Your SkyCaddie TOUCH requires the use of maps to provide distance information on the device. SkyCaddie uses the only method that Tour caddies use to provide distances to their Pros: we walk the course. With a course library of over 35,000 maps, worldwide, SkyCaddie maintains the largest ground-mapped course database in the world. No one else uses this method, because it is very expensive in terms of labor and money. SkyCaddie invests thousands of man-hours and millions of dollars every year to maintain our ground-mapped course library because we believe your game is worth it. Our members trust the information that their SkyCaddie provides them, which is why SkyCaddie has remained the leader in this technology. Our course map library is growing daily. Whenever we receive a notification that a course layout has changed, we send a mapper out to re-map the course, so that our members have the most up-to-date distance information in the game.

Your SkyCaddie TOUCH comes pre-loaded with over 35,000 courses error-corrected, high-definition course maps, which include HoleVue and IntelliGreen. In addition, your SkyCaddie TOUCH also has the capacity to store up to 100 of your favorite courses with Vivid HD graphics, which will be automatically updated with the latest information every time your sync via the USB cable or with the convenience of Bluetooth.

2.2.1 FREE 30-DAY COURSE MAP EVALUATION

Your SkyCaddie TOUCH includes a 30-day trial in order to play with your TOUCH right out of the box. The complimentary 30-day trial period will begin after your first round of golf. After the trial period you will need to complete the registration process and sign up for a SkyGolf membership plan that best suits your playing requirements. See [www.shop.skygolf.com](http://www.shop.skygolf.com) for more details.

2.2.2 UPDATING COURSE MAPS VIA BLUETOOTH®

NOTE: Selecting or deselecting courses in your list does not impact your preloaded library of course maps.

1. Make sure you have paired your SkyCaddie TOUCH with your mobile device (see section 1.1.3).

2. On your SkyCaddie TOUCH, select the “Sync” button on the Main Menu to turn on Bluetooth and connect to your mobile device.

3. On your mobile device, open the SkyGolf 360 app and go to “Courses” at the bottom of your screen.
4. Select your SkyCaddie TOUCH from the device drop down.

5. Select the courses that you play regularly. To remove courses from this list and from your SkyCaddie TOUCH, simply deselect them.

6. Press “Sync” button at the bottom of your screen to update your course maps on your TOUCH via Bluetooth. The SkyGolf 360 app will indicate when the sync is complete.

### 2.2.3 UPDATING COURSE MAPS VIA THE ENCLOSED USB CABLE

1. Connect your SkyCaddie TOUCH to your computer via the enclosed USB cable.

2. Click the “Sync” icon on the SkyGolf website, to initiate CaddieSync Express and to connect to your online SkyGolf account using your SkyCaddie TOUCH.

3. After completing the sync process, select the courses that you play regularly in the “Courses” section of your account. To remove courses from this list and from your SkyCaddie TOUCH, simply deselect them.

4. Click on the “Sync” icon on your computer screen to send the selected courses to your SkyCaddie TOUCH.

5. CaddieSync Express will indicate when the sync is complete.

**NOTE:**
Selecting or deselecting courses in your list does not impact your preloaded library of course maps.
CHAPTER 3

3.0  PLAYING GOLF WITH YOUR SKYCADDIE TOUCH

3.0.1  ACQUIRING GPS SIGNALS

While standing outside prior to play, power on the SkyCaddie TOUCH by pressing the Power button. The TOUCH will power on and display the Main Menu. Press “Play Golf” to begin. The TOUCH will search for satellite signals. Once satellite signals have been acquired, the Satellite Signal Indicator at the top of your screen will show the signal strength, represented by a series of open and solid circles. The TOUCH will then automatically advance to the next screen (or you may choose to manually advance to the next screen and select a course to play while the GPS continues to search for signals).

3.0.2  SELECTING A COURSE TO PLAY

1. To start a round, press the “Play Golf” button in the Main Menu of your SkyCaddie TOUCH.

2. Your SkyCaddie will automatically search for the golf course nearest to you, but you can also select the course you’d like to play or preview by pressing the “Course Library” button. The list of your downloaded courses will appear. Use the “+” and “−” buttons to scroll through the entire list.

3. If you have not yet created a list of your courses or if you would like to select another course from the library, you can press on one of the following three icons at the bottom of your screen:

   Your Courses: Select a course from up to 100 Vivid HD courses you have downloaded via SkyGolf 360 or via the SkyGolf website. This list of courses will be sorted by distance from your current location. (See section 2.2.2 for more
Courses Nearby: After acquiring a GPS signal outdoors, your SkyCaddie will auto-select the nearest golf courses, based on your current position. This list of preloaded courses will be sorted by distance from your current location.

Library Search: Select a course from the library of preloaded, high-precision golf courses. Press the “+” and “-” buttons below the screen to scroll through the menu lists that follow and press to select:

a. The Region (typically the country) of the golf course’s location.

b. The State/Province or other sub-region where the course is located.

c. After you select a Sub-region, you will also be prompted for a Zone, such as when playing one of the Hawaiian islands’ courses.

Search for the course by name by scrolling through the list of courses shown on the TOUCH. Once you have discovered the course, press on its name to select it. Your TOUCH will load that course map so you can either play that course or preview it in Demo Mode.
4. After you’ve made your selection, the screen will display information about your selected course, including its phone number. Press the “Back” button to return to the previous menu or press on “Play Now” to verify and adjust your round options, if necessary (also see section 3.4.3). Here you can also turn on “Demo” mode to preview the course. (When you’re ready, you may need to use the “+” and “−” buttons to scroll through the list of options.

5. Press the “Start Round” button to begin play.
3.1 HoleVue® and Advanced Course Management Features

With an eagle’s view of the entire hole, get the distances you need to avoid hazards and play smart golf. HoleVue offers a TrueGround®-verified and error-corrected graphic of every golf hole. With HoleVue, you’ll see the ideal line of play for that hole, real-time distances for the tee shot and approach shot, plus you can re-position the line of play to know the distance to any point on a hole in order to play with fewer strokes.

3.1.1 Overview of Interactive HoleVue® with Zoom:

- **Hole in Play:** During play, press the “Hole” button on your screen to manually advance to a different hole than the one you are on. If Auto-Hole Advance is turned on, you will not need to press this button, since the TOUCH will know to change holes automatically. To advance or reverse manually, however, press the new hole number and your SkyCaddie will advance you to that hole.

If the driving range at the facility you’ve selected has been mapped by a
SkyCaddie Mapper, the Driving Range feature will display the actual distance to each yardage sign based on the location of the hitting area. You can access it by pressing the “Hole in Play” button to display the Hole Selection screen. Next, press the “DR” button near the top of your screen.

- **Dynamic RangeVue™**: Multiple yardage arcs overlay fairway landing areas and greens to allow you to select the best club for every shot much more quickly. Use RangeVue™ to get the distances you need to start playing smarter and faster from tee to green. Press anywhere on the HoleVue screen to display or hide Dynamic RangeVue. By default, RangeVue is set to be on.

- **Mark Ball**: The Mark Ball feature of your SkyCaddie TOUCH calculates your shot distance. This feature is useful in determining how far you typically hit each club in your bag, leading to better club selections and an overall improvement in course management. To use, press the Mark Ball Button, then press the “Mark” button before taking your shot. Press the “Mark” button again when you get to the location where your ball landed and the shot distance will be displayed.

- **Digital Scorecard**: At the end of each hole, the Score Entry screen will display if “Prompt Score is turn ON (see section 3.4.3). Your TOUCH does not automatically track your scores, however you can enter them after you play each hole. (Also see section 3.4 for more related to scoring.)

- **Line of Play**: Whether you can see what’s ahead or not, you can measure to any point on the hole by moving the cursor in the yellow intended line of play. Simply press and hold anywhere on the HoleVue screen to adjust its position. Drag your finger to the intended position and then lift up off the screen. The SkyCaddie TOUCH will now calculate distances to this new position. (See section 3.1.3.)

- **Green Distance**: To enlarge and access detailed information on the hole in play, press on the Green distance number, which shows the direct distance between the current position of the cursor and the center of the green (or the current pin position, based on the placement of the crosshairs in IntelliGreen; section 3.3), displayed at the top right of your screen. Press again on the Green distance number or on the pop-up itself to return to the previous golf view. If the screen isn’t touched for several seconds, the TOUCH will also revert back to the HoleVue screen on its own.
• **Views:** You can cycle between the different views on your SkyCaddie TOUCH manually, by pressing the “View” button. (See section 3.2 for more details.)

• **+ and - buttons:** These buttons have two basic functions:

  a. When on a HoleVue screen, press the “+” button below the screen to zoom in and press the “–” button to zoom out manually.

  b. In Target View these buttons allow you scroll up and down through the list of Targets.

### 3.1.2 YOUR LINE OF PLAY

**Create a personal fairway target:**

When you first open a hole, the TOUCH will automatically draw a yellow line between your current location and the recommended target for your tee shot, based on the par for the current hole. If you would like to adjust the recommended target, use your finger to drag the cursor to anywhere on the hole. The distance from your location to the target and the remaining distance to the green will instantly appear. After adjusting, the recommended target still appears on the screen as a red icon for reference.

**Zooming IN or OUT:**

Pressing the “+” and “-” buttons below the screen will allow you to zoom three levels of the HoleVue graphic, centered around the position of your fairway target. The first level of zoom provides a closer look at the fairway, the second level may include a closer view of the hazards that will affect your approach shot, and the third level zooms directly to IntelliGreen. While on IntelliGreen, press the “+” button once more to return to return to HoleVue.

If you are in close proximity to the green, HoleVue will automatically display the IntelliGreen screen to help you manage your approach shot.
3.1.3 DETERMINING SHOT DISTANCE

You can use the TOUCH to store the distance of your drive and any shot. To measure how far you’ve hit your ball:

1. Press the Mark Ball button before your tee shot and the “Mark New Ball Location?” pop-up screen will display.

2. Press on the “Mark” button to record your current location. The TOUCH will automatically close the pop-up menu.

3. When you get to the location where your ball came to rest, press the Mark Ball button again to record and the distance from your last mark to your current position will automatically update as you advance down the fairway.

Be sure to press “Mark” in the confirmation screen. Your shot distance will be displayed on the Mark Ball icon, unless you’re on the IntelliGreen screen.

3.2 CHANGING GOLF VIEWS

When playing a course, you have the ability to cycle between different views* manually, by pressing the “View” button:
• **Interactive HoleVue®** – An eagle’s view of the entire hole. *(Default View)*

• **IntelliGreen®** – Dynamically displays the exact shape of the green from your angle of approach to turn every shot into a scoring opportunity. Get front carry and back distances, depth of green, and distances to any other point on the green — simultaneously. *(Default View)*

• **Target List** – displays distances to hazards, carries and layups located ahead from your position on the hole. *(Optional View)*

• **Basic View** – Large distances to the front, center and back of the green. *(Optional View)*

• **IntelliGreen® Pro** – IntelliGreen® Pro is another proprietary feature that adds distances to major green contours and false fronts — plus any other point on the green from your angle of attack to save strokes and reduce three putts. Not all courses have significant green contours that require this feature.

* All views may not be available on all courses.

3.2.1  AUTO VIEW TECHNOLOGY

AutoView, when combined with SkyCaddie’s other intelligent automation features including AutoCourse Select, AutoHole Advance, HoleVue’s AutoZoom and IntelliGreen’s AutoGreen rotation (aligns with your angle of approach), allows the SkyCaddie to operate from the first tee to the 18th green with virtually no button pushes or touching your screen.

AutoView is designed to provide golfers with a hands-free way of switching between multiple play screens including HoleVue, IntelliGreen and their Digital Scorecard, with just a simple turn of the wrist. AutoView Technology is controlled by the TOUCH’s built-in accelerometer to provide three viewing positions – one “portrait position” and two additional “landscape positions”.

With AutoView enabled in SETTINGS, you have buttonless access to the Scorecard by turning the screen of your SkyCaddie TOUCH counter-clockwise to a landscape format.

Access the IntelliGreen or IntelliGreen Pro View by turning the screen of your SkyCaddie TOUCH clockwise to a landscape format.
Returning the TOUCH to a portrait orientation will return you to the previous Golf view.

Your SkyCaddie TOUCH will automatically revert to portrait view after a few moments as a reminder that your TOUCH should be upright for maximum GPS accuracy.

3.2.2 CHANGING AUTOVIEW SETTINGS

1. In the Main Menu, press on the “Settings” button.
2. Press on “Views”.
3. Press on AutoView to toggle between On or OFF to enable or disable Landscape View.
4. Press the “Back” button or the Menu button to return to the Main Menu.

3.2.3 ADJUSTING AUTOVIEW SENSITIVITY

You can also adjust the sensitivity of AutoView (“AutoView Sens”). This controls the level of rotation needed to trigger the accelerometer to switch between portrait and landscape positions. By default, the sensitivity is set to medium.

1. In the Main Menu, press on the “Settings” button.
2. Press on “Views”.
3. Press on “AutoView Sens” and toggle to the desired sensitivity.
4. Press the “Back” button or the Menu button to return to the Main Menu.
3.3 OVERVIEW OF INTELLIGREEN® AND ONSCREEN FEATURES

INTELLIGREEN® OVERVIEW

SkyGolf’s proprietary IntelliGreen® technology graphically displays the true shape of the green, automatically rotating it to match your angle of approach. It turns every shot into a scoring opportunity by providing front carry and back distances, depth of green, and distances to any other point on the green — simultaneously. If the Advanced Feature Course you are playing has the HoleVue feature, you will be able to see greenside hazards including bunkers and water with IntelliGreen. Each distance is determined by the position of the crosshairs in relationship to your current position.

Using the touch screen, you can dynamically interact with the IntelliGreen. If RangeVue® is on, you will see yardage arcs displayed with preset distances, for quicker club selection. Press anywhere outside the outline of the green to display or hide Dynamic RangeVue.

- To get a distance to any point on the green, press anywhere inside the green to move the crosshairs to that position.
• For precision placement, tap or press and hold the numbers is played at the ends of the target crosshairs

This view also includes the automatic depth of the green and the distance from your last mark, if you used the Mark Ball feature on the hole. Green depth is an automatic calculation of the depth of the green for your line of approach. (See section 3.1.3 for more instructions on marking your shots.)

Press the “View” button to change views.

3.3.1 INTELLIGREEN® PRO

Built on proven IntelliGreen technology, IntelliGreen Pro feature offers all of the functionality of IntelliGreen, plus the ability to display major tiers, contours, false fronts and mounds from your angle of approach to the green. As with IntelliGreen, you can toggle the RangeVue feature on or off for quick, present yardages by pressing anywhere on the screen. You can drag the IntelliGreen crosshairs to the ridge lines on the image of the green to get instant distances and depth information to major tiers. This kind of crucial scoring information is only possible by precision-mapping a golf course from the ground. If an Advanced Feature Course map has an IntelliGreen Pro feature, your TOUCH will use this version of IntelliGreen by default.

IntelliGreen Pro feature Reminder: You can toggle RangeVue on or off on the IntelliGreen and IntelliGreen Pro screens simply by pressing anywhere on the screen, outside the image of the green.
3.3.2 TARGET LIST (HAZARDS, CARRIES AND LAYUPS)

The Target List displays a list of distances to hazards, carries and layups located ahead from your position on the hole. Use the “+” and “-” buttons to scroll up or down through the targets manually, or let the TOUCH automatically update the list of targets ahead, as you move down the fairway. The Target List also calculates and displays the “Leaves” distance to the Center of Green from the highlighted target. If you marked your previous shot using the Mark Ball button, the distance from that last mark will be displayed in the center of the Target List screen. Appendix B contains a table of targets.

3.3.3 FRONT, CENTER AND BACK SCREEN (BASIC VIEW)

Displays the distances to the front, center and back of the green from your angle of approach in a very large number for easy viewing.

3.4 THE DIGITAL SCORECARD

To view or change your settings for the digital scorecard, in the Main Menu press the “Settings” button.

- **Handicap:** Press on “Handicap” and then press the up and down arrows to adjust your handicap. Press the “Back” button to return to the previous menu.

- **Prompt Score:** Your TOUCH can prompt you automatically to enter your score at the end of each hole. Press on “Prompt Score” to turn this feature on or off.
3.4.1 USING THE SCORING FEATURE DURING PLAY

At the end of each hole, the Score Entry screen will display if the “Prompt Score” option (see 3.4.3) is on. The initial score will default to par. Use the “+” and “-” buttons on the screen to adjust the number of shots and putts it took to complete the hole. You can also indicate whether you hit the fairway, if you missed, or if you hit right or left of the fairway.

When you are finished, press the “Score Entry” button to view the complete scorecard which shows a summary of how many holes have been played to that point in your round, how much over or under par you are, your total score, and number of putts. Press the “Back” button to continue to the next hole.

During play you can also view your scorecard by turning the TOUCH counter-clockwise without pressing any buttons, if the AutoView feature is on. You can press the “Exit” button to return to the Green View or simply return your SkyCaddie’s screen to an upright position to return to the Green View automatically. (Refer to section 3.2.1 for more information about AutoView.)

The Over/Under Summary tracks your performance against the pars for each hole. A negative number represents strokes under par; a positive number represents strokes over par. An “E” displays if you complete a hole at par. When you are finished viewing this screen, you can either press “Exit” (in AutoView) or the “Back” button to return to the Green View, and continue with your round, or press the “Enter Score” screen button to edit your score.
3.4.2 EDITING THE DIGITAL SCORECARD

You can edit your Digital Scorecard during or after your round on your SkyCaddie:

1. Press the “Enter Score” button on your screen.
2. Press on the hole number at the top of your screen and select the number of the hole you want to edit.
3. Use the “+” and “−” buttons on the screen to adjust the number of shots and putts it took to complete the hole.
4. Press the “Scorecard” button to review your entire scorecard or press the “Back” button to return to the Green View.

3.4.3 SETTING ROUND OPTIONS

When on a HoleVue screen, you set several Round Options by pressing the Menu button:

1. **Round Type:**
   - **Standard:** Rules of Golf followed on a rated course during its active season.
   - **Practice:** Rules of Golf were not followed for the majority of the holes, such as multiple balls played (doesn’t affect handicap).
   - **Tournament:** Official tournament where you played your own ball
   - **Scramble:** Score played on a course that has an inactive season (doesn’t affect handicap).

2. **Prompt Score**

   Press the “Back” button to return to the HoleVue screen.
3.4.5 REVIEWING SAVED ROUNDS

The TOUCH will store up to 20 rounds for you to upload to SkyGolf 360 in order to review or edit them online. Once the rounds have been uploaded to the SkyGolf 360 Cloud, they will be erased from your SkyCaddie TOUCH.

To manually delete Rounds on the TOUCH:

1. In the Main Menu, press the “Saved Rounds” button

2. Use the “+” and “-” buttons on the screen to scroll through the list of saved rounds and then press on the round you wish to review.

3. Press “Delete” if you prefer to delete this round. Otherwise, choose “Cancel” to return to the list of saved courses.

4. Press the “Back” button or the Menu button to return to the Main Menu.

CHAPTER 4
SKYCAZZIE TOUCH SETTINGS

4.0 THE SETTINGS MENU

In the Main Menu, press the Settings button to access a list of settings and adjust them to fit your style of play. Within Settings, use the “+” and “-” buttons below the screen to scroll through the longer menus and press on the setting you wish to modify.

4.0.1 BASIC SETTINGS

- **Distances**: Press on “Distances” to toggle between imperial (Yards and miles) and metric (Meters and kilometers) units as your preferred measure of distance.

- **Backlight**: The Backlight default is set at 60%. To adjust the Backlight percentage level, press “Backlight” to toggle through the options from 0% to 100% and press the “Back” button to
save your selection. It is recommended to keep the setting at 60% or lower to maximize battery life on a single charge.

- **Auto Hole**: Press on “Auto Hole” to toggle between ON and OFF. Turn ON Auto Hole to enable the Auto Hole feature to automatically advance to the next hole during play. (Also see section 3.1.1 for more details regarding this feature.)

- **Auto Off**: Your SkyCaddie TOUCH can be set to turn itself off after a certain period of inactivity:
  a. **Never**: This setting will prevent your TOUCH to turn itself off automatically. You will need to manually turn off your TOUCH after play to conserve the battery charge, otherwise your TOUCH will continue to run until its battery charge has been depleted, which has a negative effect on the longevity of your battery.)
  b. **30 Minutes**: Your TOUCH will turn itself off after 30 minutes of inactivity.
  c. **60 Minutes**: Your TOUCH will turn itself off after 60 minutes of inactivity.
  d. **90 Minutes**: Your TOUCH will turn itself off after 90 minutes of inactivity.

- **Views**:
  a. **Active Views**: Press “Active Views” to open the list with available views on your SkyCaddie TOUCH during play. Press the boxes to enable or disable these views. A checkmark indicates that the View has been enabled:
  b. **Basic View**: See section 3.2 for more details.
  c. **HoleVue**: See section 3.2 for more details.
  d. **IntelliGreen**: See section 3.3 for more details.
  e. **Target List**: See Appendix B for more details.

Press the “Back” button to return to the previous menu or press the Menu button to return to the Main Menu.

- **Show Green At**: Use the Up and Down buttons on the screen to adjust the distance from the center of the green at which you wish your TOUCH to automatically display the IntelliGreen feature. The default to switch to IntelliGreen is 220 yards. You
may adjust this setting from 50-500 yards. Press the “Back” button to return to the previous menu or press the Menu button to return to the Main Menu.

- **Show Targets Over**: Use the Up and Down buttons on the screen to adjust the distance at which you want your TOUCH to display your fairway target when you make your approach shot. Press the “Back” button to return to the previous menu or press the Menu button to return to the Main Menu.

- **AutoView**: Press on “AutoView” to turn AutoView ON or OFF. This setting is set to “Off” by default. (Also see section 3.2.1)

- **AutoView Sens**: Press on “AutoView Sens” to toggle between the sensitivity settings (Low, Medium, or High sensitivity) which determine the level of rotation needed to trigger the accelerometer to switch between portrait and landscape positions. By default, the sensitivity is set to medium.

- **Vivid HD+**: Press on “Vivid HD+” to toggle between ON and OFF. (Also see section 2.2 for more details regarding this feature.)

### 4.0.3 SCORING

- **Handicap**: Use the Up and Down buttons on the screen to adjust the handicap you want the scorecard to take into account when calculating your total scores.

- **Prompt Score**: Press on “Prompt Score” to toggle between ON and OFF. (Also see section 3.4.3 for more details regarding this feature.)

### 4.0.4 ACCESS CODE

Displays the unique access code for this SkyCaddie TOUCH, which you may need to refer to during registration of this device.

### 4.0.5 HELP

Several helpful pictorial explanations of various functions of your SkyCaddie TOUCH for reference during play. Press the Menu button or the “X” button to return to the Settings Menu. Press the Back button to return to the Main Menu. To continue your round, press the “Resume” button.
4.1 SYSTEM

4.1.0 THE SYSTEM MENU

You should not have to access this menu except for during initial set up or when asked to by SkyGolf Customer Service Representative for diagnostic purposes.

- **GPS:** View your active satellite signals. The reset option will reset the GPS receiver. This function may be used while troubleshooting with a SkyGolf Customer Support Representative or if you notice that your satellite signal appears to be poor.

- **Adjust Time:** Press on “Adjust Time” and change the hour by pressing the up and down arrows. Your TOUCH will automatically synchronize the minutes.

- **Language:** Press on “Language” to set your preferred language in which to view screens. Use the “+” and “−” buttons below the screen to scroll through the list of languages:

</table>

- **Touch Screen:** This is a diagnostic tool you should not need to access under normal circumstances. Follow the onscreen directions until this Mode returns you to the previous menu.

- **Touch Test:** This is a diagnostic tool you should not need to access under normal circumstances. Press the Menu button to return to the previous menu.

- **User Data:** Press “User Data” only if you wish to delete all of your rounds currently saved on your SkyCaddie TOUCH without first uploading them to SkyGolf 360. This action cannot be undone and you will need to sync your TOUCH to restore your membership details on the device.

- **Factory Reset:** Press “Factory Reset” only if you wish to delete all of your data and personalized settings from your SkyCaddie
TOUCH. Pushing the “OK” button will completely reset your device. This action cannot be undone and you will need to sync your TOUCH to restore your membership details on the device.

- **Reset Bluetooth®**: Press “Reset Bluetooth” if you wish your SkyCaddie TOUCH to erase its knowledge of (“forget”) any devices to which it may previously have been paired. To reestablish a Bluetooth connection with your TOUCH, you’ll need to go through the pairing process (see section 1.1.3)

### 4.1.1 MEMBERSHIP

- **Serial Number (ESN)**: Displays your SkyCaddie’s unique Electronic Serial Number.
- **Membership**: Shows what SkyCaddie membership you are currently subscribed to.
- **Good Through**: Displays your membership’s expiration date.

### 4.1.2 INFO

This menu item is a listing of all version numbers pertaining to your specific SkyCaddie TOUCH and its applications. You should not have to access this menu except for when asked to by SkyGolf Customer Service Representative for diagnostic purposes.
APPENDIX A

HELPFUL HINTS

• Never disconnect or turn off your SkyCaddie TOUCH while it is syncing, either via a USB cable connection to your computer or via a Bluetooth® wireless technology connection to your smart device. Wait until it is finished communicating before you disconnect it, power it off, or power off your computer.

• Turn on your SkyCaddie TOUCH outdoors, with a clear view of the sky, to receive satellite signals. Give it an initial five minutes to warm-up before play.

• While the omni-directional, high-performance GPS antenna has been designed to lock quickly to more satellites and stay locked to maintain performance in all terrains, it is still a good idea to avoid being around buildings, obstructions, heavy foliage, low areas with adjacent obstructions, or reflective objects (such as metal/glass structures) while using the TOUCH.

• The higher the strength on the GPS Signal Indicator, the higher the accuracy. The best signal strength is obtained in open areas, with the antenna pointing toward the sky at a 45° to 90° angle. Holding the TOUCH away from your body may improve signal strength in weak areas. It is normal for the satellite signal strength indicator to fluctuate as you move around the golf course.

• To maintain optimal accuracy during play, ensure that your SkyCaddie TOUCH is always on, that it is in an upright position and that it has a clear view of the sky. Do not put the SkyCaddie TOUCH in your pocket.

• Do not turn the TOUCH on and off during play. The TOUCH is a “smart system” that continues to download data from satellites to adjust to your environment during play. It is designed to stay on continuously during a round of golf. Turning it on and off will interrupt satellite communication and slow down play. If you take a long break at the turn, you may turn your SkyCaddie off to conserve battery power. When you turn it back on, remember to allow 5-10 minutes for it to return to optimal GPS accuracy. In the Main Menu, press “Resume” to continue your round.

• Fully charge the battery before each round.
• DO NOT use AC chargers or USB cables that did not come with or are not authorized for use with your TOUCH. The wrong adapters or cables may damage the TOUCH.

• Sync your TOUCH regularly. Syncing regularly allows the TOUCH to keep running at peak performance. Syncing allows you to check alerts for new features and software updates; automatically upload your latest scorecard to SkyGolf 360, update your course maps, and download add Vivid HD maps to your list of courses.

• DO NOT expose your TOUCH to extreme temperatures. Treat it like you would your cell phone.

• Your SkyCaddie TOUCH is designed for wet conditions that exceed those typically encountered while playing golf. Still, you should take care not to expose your SkyCaddie TOUCH to water, as too much exposure to water may cause damage, such as might happen if you drop your SkyCaddie TOUCH into the water hazard while looking for your ball. If you do get your SkyCaddie TOUCH wet, do not attempt to dry it with an external heat source like a microwave oven or hair dryer. SkyCaddie TOUCH devices that do manage to get water damaged are generally not serviceable.

• Never attempt to repair or modify your SkyCaddie TOUCH yourself. Disassembling your SkyCaddie TOUCH will void the warranty. Your SkyCaddie TOUCH does not contain any user-serviceable parts. Service should only be provided by a SkyGolf® Authorized Service Provider. If your SkyCaddie TOUCH has been punctured, or subjected to a severe fall, do not use it until you contact an Authorized Service Provider. The rechargeable battery in your SkyCaddie TOUCH is not user-replaceable and should be replaced by a SkyGolf Authorized Service Provider only. For service information, go to www.SkyCaddie.com.

**SYSTEM REQUIREMENTS**

To register and activate your TOUCH go to www.skygolf.com and click on the SYNC button in the top right corner of your screen. Your computer must meet the minimum system requirements:

• Available USB 1.1 or 2.0 port

• PC Microsoft® Windows® Vista / 7 / 8 (32- or 64-bit) OR MacOS® 10.6 or higher

• 512 MB of RAM (1 GB of RAM recommended)
• 100 MB of available hard disk space

• Internet access (High-speed recommended) with the latest version of web browser installed (e.g. Microsoft® Internet Explorer® 9.0 or newer, FireFox®, Safari®, or Chrome)

Have a New Computer? If you recently purchased a new PC or Mac (within the last year or so), it should be compatible with the SkyCaddie TOUCH system.

U.S. FEDERAL COMMUNICATIONS COMMISSION REGULATORY AGENCY COMPLIANCE

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interferences received, including interference that may cause undesired operation.

NOTICE: The FCC warns that user modifications of this device without the express approval of SkyHawke Technologies could void the user’s authority to operate this device.

CANADIAN REGULATORY AGENCY COMPLIANCE

This digital apparatus does not exceed the Class B limits for radio noise emissions from digital apparatus as set out in the interference causing equipment standard entitled: “Digital Apparatus”, ICES-003 of Industry Canada
# Appendix B

APPENDIX C

BATTERY INFORMATION AND SAFETY REQUIREMENTS

Failure to comply with all of the following precautions could:

- Cause personal injury or property damage
- Cause abnormal chemical reactions which would make the battery overheat, smoke, distort, leak, explode, or catch on fire
- Destroy internal protections built into the battery
- Shorten battery life
- Reduce battery performance

The TOUCH battery has been rigorously tested, and is in full compliance with applicable UN, ITC, IATA, and other regulatory requirements for batteries of this type.

The TOUCH with battery installed has been further tested and is in full compliance with MIL-STD 810F standards for surviving high and low air pressure environments; storage and operation at extremes of temperature and humidity; rapid changes in temperature; extended periods of vibration; repeated drops onto a hard surface on each side, edge, and corner; blowing dust and sand; and drenching, torrential rain.

- Use only a SkyGolf-supplied charger with your TOUCH.
- Do not leave your TOUCH attached to a charger or a USB port for over 24 hours. Under the recommended conditions, a completely discharged TOUCH battery should completely re-charge in about 4 to 4.5 hours when on the charging screen.
- Do not charge the TOUCH in a place where it could become over heated by direct sunlight, a stove, a fire, or other source of extreme heat.
- Keep the TOUCH away from sources of high voltage or static discharge.
- If your TOUCH will be stored for an extended period, allow the battery to discharge to approximately one half capacity before storage.
- Store the TOUCH in a place where it will not experience temperatures or absolute humidity over 85%.
• Do not put the TOUCH into a microwave oven.

• Do not allow the TOUCH to be crushed.

• Do not incinerate or burn a TOUCH.

• Do not leave a TOUCH where it could become submerged in water.

• If your TOUCH is overheating, leaking, smoking, or if you detect an unusual odor, do not touch it. Using the end of the USB cable away from the TOUCH, immediately disconnect the cable from any charger or USB port.

• Do not touch a leaking TOUCH. Avoid leaked-out materials. Do not allow these materials to touch your skin or clothes. If touched, immediately rinse affected areas thoroughly with water. Leaked materials may cause skin irritation. Seek medical attention if irritation persists. If leaked material contacts your eyes, do not rub your eyes. Rinse the eyes thoroughly with water, and see a doctor immediately.

• Opening the SkyCaddie will void your warranty.
